

A Larsen & Toubro
Group Company

LTM

Saijayachandraraju Ratnakaram

Experience Summary

- Current Role: Senior Software Engineer
- Over 3.8 years of experience in the IT industry across multiple domains, with a strong focus on development and building robust business logic.
- Skilled in designing, implementing, and maintaining enterprise applications with a strong focus on system reliability, performance optimization, and issue resolution.
- Proficient in MS-SQL & PostgreSQL and best practices using Python.
- Experienced in using version control systems, primarily Git, for source code management and collaboration.
- Comfortable working independently as well as in collaborative team environments, with the ability to handle multiple tasks effectively.
- Proven expertise in incident management, root cause analysis, bug fixing, and automation to ensure seamless business operations.
- Strong Knowledge of Database Optimization & Performance Tuning.

Skills Summary

Domain	Media & Entertainment – Paramount Global, Viacom.
Programming Languages	T-SQL, Python, PL/pgSQL
Operating System	Windows 10, 11
Tools / Data Bases	Microsoft-SQL, PostgreSQL, DDL, DML, Performance tuning, SDLC, Github, Zendesk, New relic, Sumo logic, Git, pgAdmin, DBeaver, Data Modelling, Normalization
Cloud Services	AWS (S3), GCP

Professional Certifications / Trainings

- Google Cloud Certified Associate Engineer
- Oracle Certified Professional (OCP) – Oracle cloud infrastructure
- Microsoft Certified- Database Administrator Associate
- Python Fundamentals – Great Learning
- Generative AI by Google Cloud
- Shoshin Claude 101
- Shoshin M&E Domain
- Shoshin GenAI Unveiled

Work Experience

Project 1

Project Name	Paramount-MS FMB Services	Team Size	15+
Start Date	February 2025	End Date	June 2026
Project Description	As a team member performed activities like Analysing the issues and Trouble shooting and finding out the root cause and coordinating with L3 or users for issue fixation to maintain SLA.		
Role & Contribution	1. Analyzed legacy relational schemas and rewritten poorly performing queries, optimizing indexes, partitioning tables, and rewriting complex views using T-SQL/PL/SQL. This reduced daily reporting query execution times by 20-30%. Performed initial screening of user related tickets & BIG Panda related alerts and database queries. 2. Escalated unresolved or complex issues to L3 support while ensuring proper documentation and communication. 3. Monitored application health, server logs, and alerts to proactively identify potential issues. 4. Conducted in-depth analysis of escalated issues, performing root cause identification and implementing permanent fixes. 5. Debugged code, optimized queries, and applied patches to improve system performance and reliability. 6. Collaborated with developers and cross-functional teams to resolve complex technical problems. 7. Completed the Escalation tickets report which help leads to prepare WSR report on weekly basis.		
Technology &Tools	MS SQL, PostgreSQL, AWS, SQL, ITIL, Sumo Logic, New Relic, JIRA, Service Now		

Project 2

Project Name	MD-FMB-Content Platform-Content Workflow	Team Size	10+
Start Date	January 2024	End Date	December 2024
Project Description	In the PNM Soft App Ops Support Our client is Paramount Global where I have Monitored application logs, performed root cause analysis to make sure the client applications working well.		
Role & Contribution	1. Provided support and maintenance for Python-based enterprise systems, ensuring high availability and reliability. 2. Analysed, diagnosed, and resolved technical issues, bugs, and performance bottlenecks within existing applications. 3. Collaborated with cross-functional teams to understand business requirements and deliver timely fixes or enhancements.		

	- Monitored application logs, performed root cause analysis, and implemented preventive measures to reduce recurring issues. - Assisted in deploying patches, updates, and configuration changes in production and staging environments. - Participate in project meeting to discuss project progress report every day. - Collecting real time data for data preprocessing and it's classification.
Technology &Tools	Microsoft-SQL, AWS, Universal Workflow & Alias Dashboards Client-side Tools, Python

Project 3

Project Name	MD-FMB-Legal PnmSoft App Ops Support	Team Size	10
Start Date	March 2023	End Date	December 2023
Project Description	Performed activities like Analysing the issues and Trouble shooting and finding out the root cause by running the multiple queries to check the job count based on the reported issues for both user related tickets & others.		
Role & Contribution	- Manages MSSQL, PostgreSQL clusters, backups, replication, and performance tuning. Ensures compliance and availability. - Works with DBeaver and pgAdmin to run queries, visualize schemas, and troubleshoot database connectivity. - Uses log monitoring tools to detect anomalies, trace errors, and support incident resolution. - Manages PostgreSQL roles, privileges, and schema access. Implements least privilege and audits for compliance. - Oversees troubleshooting workflows, documents runbooks, and ensures quick resolution of production issues.		
Technology & Tools	MSSQL Management, AWS, Python, SQL, pgAdmin, DBeaver, PostgreSQL role management		

Educational Qualification

Education & Credentials	Bachelor Of Technology- BTech from Jawaharlal Nehru Technological University JNTUA-GPRE with CGPA-7.56 in the year August 2022
