

Aryan Gawade 10827455

Experience Summary

- Certified Java Full Stack Developer experienced in building robust backend services using Java (Spring/Spring Boot) and developing responsive front-end applications using modern UI frameworks.
- Skilled in analyzing project requirements, executing development tasks, and preparing technical documentation.
- Hands-on experience with Core Java, python, Spring Boot, Angular, JavaScript, TypeScript
- Proficient in building RESTful Web Services using Spring Framework and Spring Boot.

Skills Summary

Domain	Banking & Financial services.
Programming Languages	Core Java, JavaScript, TypeScript, SQL, HTML, CSS
Operating System / ERP Version	Windows 10
Tools / DB / Packages / Framework / ERP Components	Core Java, Spring , Spring Boot, Spring RESTful Webservices, Spring Boot, Postgres DB, JSON, Tomcat, Maven, File I/O, GitHub.

Professional Certifications / Trainings

- Completed Orchard training on JAVA Full Stack (Core Java, Spring Boot, Angular, HTML, CSS, TypeScript, JavaScript, SQL).
- Oracle Certified Professional: JAVA SE11 Developer (OCJP)
- Python for Data Science –NPTEL
- GenAI Foundation Course Completion Certificate.
- Automation testing by Epam Systems.

Work Experience

Project 1			
Project Name	Vehicle Loan Hub	Team Size	5
Start Date	Feb 2025	End Date	June 2025
Project Description	Developed a dynamic web-based platform that streamlines the vehicle loan process for both users and administrators. The system enables users to explore and apply for personalized vehicle loan options based on budget, tenure, and eligibility criteria, while providing admins with tools to manage and monitor loan applications efficiently. Key features include: • User/Admin Roles: Role-based access control with tailored dashboards for loan application tracking, approval workflows, and user management. • Loan Scheme Management: Admins can create, update, and manage various vehicle loan schemes, including interest rates, repayment terms, and eligibility conditions. • Application System: Users can browse available loan options, submit applications, upload necessary documents, and track approval status in real-time. • Approval Workflow: Integrated multi-stage approval process with status updates, document verification. • Feedback & Support: Built-in feedback mechanism and support ticketing system to ensure user satisfaction and continuous service improvement.		
Role & Contribution	• Backend Development: Engineered RESTful APIs with secure JWT-based authentication, leveraging JPA and MySQL for robust data persistence. • Frontend Development: Built a responsive Angular interface featuring Admin dashboards and dynamic workflows for seamless user interaction. • System Architecture: Designed a scalable and secure architecture with modular components to support future integrations and enhancements. • Project Management: Oversaw version control, maintained technical documentation, and managed deployment processes for streamlined delivery.		
Technology & Tools	Angular 10+, HTML, CSS, JWT Authentication, Java, Spring Boot, MySQL, Kafka Thunder Client (API Testing), GitHub.		

Project 2

Project Name	Enterprise Collaboration Command Hub.	Team Size	8
Start Date	July 2025	End Date	Dec 2025
Project Description	- Built a Microsoft 365–integrated platform to automate PowerPoint template selection, creation, and sharing for Command Hub. - Integrated SharePoint Communication Site to manage topic-wise PPT templates centrally. - Implemented template-to-topic mapping, ensuring only relevant templates are available based on assigned topics. - Automated document sharing with Microsoft 365 Groups using role-based permissions via Microsoft Graph APIs.		
Role & Contribution	- Developed REST APIs using Spring Boot for SharePoint and Microsoft Graph integration. - Implemented OAuth 2.0 based authentication to securely access Microsoft Graph APIs. - Built APIs to list topic folders, fetch PPT templates, create presentations, and share files with groups. - Handled group-level access control (view/edit) and resolved SharePoint permission and path issues. - Exposed APIs via Swagger UI for easy frontend integration. - Integrated Purview compliance to manage & fetch Audit logs capture on SharePoint. - Debugged and resolved SharePoint path, drive, and folder mapping issues in real enterprise SharePoint environments.		
Technology & Tools	Java, Spring Boot, Spring Web, Microsoft Graph API, SharePoint Online, OAuth 2.0, REST APIs, Swagger UI, JSON, Postman, GitHub, VS Code		

Project 3

Project Name	LTM Ops Portal	Team Size	8
Start Date	January 2026	End Date	May 2026
Project Description	LTM Ops is an internal web-based platform developed for LTM to streamline and automate employee onboarding and offboarding processes. The portal supports multiple interconnected operational workflows and emphasizes full-stack modernization with performance-driven architecture. With a focus on scalability and responsiveness, the platform integrates workflow optimization, access management, and data consistency, significantly enhancing operational efficiency within Citi's infrastructure.		
Role & Contribution	•Collaborated in Agile teams, handling Jira-tracked requirements and contributing across development and testing phases. •Contributed to the modernization of an internal Citi onboarding and offboarding platform supporting multiple operational workflows. • Developed and enhanced backend features including thread-safe transaction handling, REST API integrations, and automated ticket status updates.		
Technology &Tools	Angular 10+, HTML, CSS, JWT Authentication, Java, Spring Boot, MySQL, Thunder Client (API Testing), GitHub, Selenium, IntelliJ Idea, Automation Testing.		

Project 4

Project Name	Flight Booking Platform	Team Size	Individual
Start Date	Feb 2025	End Date	March 2025
Project Description	A web-based flight booking system enabling users to browse tickets, select flights, and reserve seats, while administrators manage theatre listings, schedules, and seat availability.		
Role & Contribution	• Developed REST APIs for flight listings, seat management, and booking workflows using Spring Boot. • Implemented role-based access control for users and admins to manage permissions and operations securely. • Built Angular components for flight browsing, seat selection, and booking confirmation interfaces. • Integrated JWT-based Authentication & Authorization to secure user sessions and admin operations. • Added validations for seat availability, booking limits, and flight timings conflicts. • Used Postman for API testing and validation across booking and scheduling modules. • Managed data persistence using MySQL, ensuring consistency across bookings and schedules.		
Technology & Tools	Angular 10+, HTML, CSS, JWT Authentication, Java, Spring Boot, MySQL, Thunder Client (API Testing), GitHub		

Educational Qualification

Education & Credentials	Bachelor of Technology in Computer Science(Data Science) , Institute Of Aeronautical Engineering,Hyderabad, Telangana.
-------------------------	--

LTM is a global technology services and consulting company and the business creativity partner to the world's largest and most disruptive companies. We bring human insights and intelligent systems together to help enterprises across industries rewire their business models, accelerate innovation, and drive AI-centric growth. With our integrated operations, transformation, and business AI services, we design and deliver solutions that create new productivity paradigms and new roads to value. Together with 87,000 employees across 40 countries and our global network of hyperscaler partners, LTM — A Larsen & Toubro company — owns business outcomes for over 700 clients, helping them to not simply outperform the market, but to Outcreate it.
