Professional Summary

Experienced SAP BASIS Administrator with 3.5 years of hands-on experience at LTIMindtree(Now LTM), specializing in managing and supporting SAP landscapes across development, quality, and production environments. Proficient in SAP system monitoring, transport management (TMS), client administration, and performance optimization. Strong expertise in SAP HANA administration, kernel upgrades, patch management, and troubleshooting critical production issues within SLA timelines. Adept at L2 support, root cause analysis, and system health monitoring, ensuring high availability and stability of SAP systems. Skilled in working with ITIL-based processes, ServiceNow/Jira ticketing tools, and cross-functional teams to deliver reliable and efficient support.

Technical Skills

- **SAP Basis Core:** SAP BASIS Administration (ECC & S/4HANA)
- **System Monitoring & Performance:** SAP System Monitoring (SM51, SM50, SM66, ST22, SM21)
- **Transport & Change Management:** SAP Transport Management System (TMS)
- **SAP HANA & Database:** SAP HANA Administration (HANA Studio / HANA Cockpit)
- **System Maintenance & Upgrades:** SAP Kernel Upgrade & Patch Management
- **Tools & Technologies:** SAP ECC | SAP S/4HANA | SAP Solution Manager
 - ServiceNow / Jira (Ticketing Tools)
 - OS: Linux / Unix / Windows
 - Database: SAP HANA / Oracle / SQL Server

Professional Experience

Software Engineer

LTIMindtree/LTM –Bengaluru

Project 1: SAP Basis Administrator – Support & Operations

Client: Paramount Global

- Provided **L2 support for SAP BASIS administration** across multiple SAP landscapes (DEV, QA, PRD)
- Monitored system performance using **ST22, SM21, SM37, DBACOCKPIT**, ensuring high availability
- Managed **SAP Transport Management System (TMS)** including transport requests, imports, and troubleshooting failures
- Performed **client copies, system refreshes**, and environment setup for testing activities
- Supported **SAP installations, kernel upgrades, patch updates**, and system configurations
- Monitored **background jobs and resolved job failures**, ensuring SLA compliance
- Handled **user administration activities (SU01, PFCG)** and resolved authorization issues
- Analysed **short dumps and logs** to troubleshoot performance and system errors
- Supported **backup, recovery, and disaster recovery activities**
- Coordinated with cross-functional teams (ABAP, Functional, DB teams) for issue resolution
- Maintained proper documentation and adhered to **ITIL-based incident management processes**

Project 2: SAP System Monitoring & Optimization

- Conducted **daily health checks** for SAP systems and proactively identified performance issues
- Optimized system performance by resolving **CPU usage, memory, and work process bottlenecks**
- Reduced system downtime by implementing **proactive monitoring and alert handling**
- Improved transport success rate by **troubleshooting TMS errors and buffer issues**

- Supported database-level monitoring and ensured system stability for production environments

Education

Bachelor of Technology (B Tech) - Jawaharlal Nehru Technological University (JNTUA) -
GPREC

06/2018 – 08/2022

Certifications

- SAP Certified Technology Associate
- ITIL 4 Foundation Certification
- SAP S/4HANA BASIS Certification
- Google Cloud Certified Associate Engineer
- Oracle Certified Professional (OCP) – Oracle cloud infrastructure
- Linux Administration Certification
